

***fingerPIN* seeks Midlands channel partners for the world's first multi-sequential fingerprinting biometric**

13 February 2007, Birmingham, Birmingham based security software vendor fingerPIN Ltd is gearing up to sign its first distributors as it announces its official channel launch.

The company, based at Aston Science Park, has been selling via the direct route to the UK market and is now keen to supplement this by establishing a channel quickly. It is due to sign two, as yet unnamed, distributors later this month.

fingerPIN offers OEMs, systems integrators, VARs and distributors logical and physical access solutions using its patented multi-fingerprint sequence technology. The fingerPIN is a biometric fingerprinting technology that increases the complexity of penetrating single fingerprint security methods. It transforms an existing single fingerprint reader into a sophisticated multiple fingerprint reader through a simple software upgrade. Through the fingerPIN the risk of someone fraudulently logging on or accessing a secure area using a third person's fingerprint data is reduced to 1 in 10,000 trillion¹ due to the difficulty of cracking a combination of several unique fingerprints used in a specific sequence.

fingerPIN is launching its logical access product matchlogon with fingerPIN to the channel in March 2007. This allows:

- logon to Microsoft Windows in seconds with usernames, passwords or tokens, by simply entering their fingerPIN sequence.
- registering multiple users and securely storing their biometric data with absolute confidence
- operating on a standalone workstation, and supporting multiple client workstations on a network
- secondary username and password functionality if desired
- logon with user's consent only

fingerPIN is targeting all market sectors from standalone workstations to multiple client workstations. The fingerPIN has no market sector constraints so for channel partners they can target all their clients with the extra biometric functionality that fingerPIN can offer.

¹ fingerPIN commissioned a research paper from a leading academic in the field of mathematics

Martine Laffan, Operations Manager said, “fingerPIN will choose partners for their fields of expertise, depth of knowledge, years of service, and passionate commitment to their customers’ success. Channel partners can access several programmes, ranging from an independent sales agent to a full VAR relationship.”

About fingerPIN Ltd

fingerPIN Ltd, established in 2006 by Muazam Sarfaraz and Atif Farooq, has developed a multi-sequencing fingerprint technology. fingerPIN is headquartered in Birmingham, UK, has 20 employees and is privately funded. For more information, please visit www.fingerpin.co.uk
