

Yoggie™ offers two years of additional free subscription on Yoggie Pico Personal™

Incredible value in time for this holiday season: Yoggie's USB Personal Security Server is available at a fraction of Recommended Retail licensing Price with a cost saving of \$60 per unit

New York, US. Yoggie Security Systems™ today announced that it is offering its Yoggie Pico Personal™ with a three year free subscription included, until the end of the holiday season. All purchasers of the revolutionary Yoggie Pico Personal™ from October 15th through December 31st 2007 will receive this holiday season offer. Buyers of the Yoggie Pico Personal™ will benefit from 12 security applications, including anti-virus, anti-spam, anti-spyware, anti-phishing, firewall, Parental Control and more, on the miniature USB Personal Security Server for this special price. The offer makes the Yoggie Pico Personal™ an even more cost-effective, fully comprehensive and integrated security suite for laptops and PCs.

Following the successful launch of the world's first USB Key size Personal Security Server – the Yoggie Pico Personal™ - in May 2007, Yoggie Security Systems™ is the first company to offer a combined package of security applications with no subscription fee, saving consumers \$60 over three years and the hassle of renewing annual licenses.

The Yoggie Pico Personal™ is part of Yoggie Security Systems' breakthrough product range of miniature security computers, which are available at leading e-tailers: Buy.com and NewEgg.com in leading high street retailer Fnac in Europe and will be introduced into high-street retailers in the US and UK in 1Q 08. A full list of e-tailers and retailers can be found at <http://www.yoggie.com/retailers>.

“We are confident that our unique and unprecedented subscription-free offer will appeal to security conscious PC and laptop users as a valuable gift or purchase. The fundamental change here is that we are making our technology even simpler to manage, and easier to appreciate. Users will be protected from multiple threats using our plug and go technology without having to pay a subscription fee – this is in addition to no longer having to manage security software updates and

having corporate level security wherever a user and his/her computing device is,” said Shlomo Touboul, CEO and Founder of Yoggie Security Systems™.

Further products in the range include the Yoggie Pico Pro™, Yoggie Gatekeeper Pro™ and Yoggie Gatekeeper SOHO™ (for protection of home and office networks of up to 5 in-line computers). The Yoggie™ range brings unrivalled IT security to both consumers and businesses.

USB-key size Personal Security Server stops known and un-known Internet attacks OUTSIDE your PC!

The Yoggie™ range of miniature security computers cleanse ALL internet traffic before it reaches the host computer. They also manage updates without user action and eliminate the requirement to run performance-spoiling security software suites.

Yoggie™ products combine best-of-breed enterprise-class software with proprietary patent-pending developments to provide a comprehensive security solution for known and unknown threats. These solutions include:

- Anti-Virus
- Anti-Spam
- Anti-Phishing
- Anti-Spyware
- Intrusion Detection System (IDS)
- Intrusion Prevention System (IPS)
- Firewall (Stateful Inspection)
- Parental Content Control
- Transparent Email and Web Proxies
- Adaptive Security Policy™
- Multi-Layer Security Agent™
- Layer-8 Security Engine™

The offer runs from 15 October 2007 and ends on 31 December 2007. After the initial three year period, users will be subject to annual subscription fees. The offer is only currently available on the Yoggie Pico Personal™. The offer is valid only while stock lasts. Terms of use are subject to the End User License Agreement included in the product. Yoggie™ reserves the right to cancel or change the terms of the offer at any time. Terms of sale shall be as actually agreed upon at the time of purchase.

- END -

About Yoggie Security Systems™

Yoggie Security Systems™ was established in 2005 by Shlomo Touboul, former founder and CEO of Finjan Software, and the inventor of Behavior Based Blocking Technology. As a result of countless meetings with IT managers around the world, Mr. Touboul realized they all share a common concern – while security

technology has matured to provide robust security, traveling laptops create security holes that jeopardize the security of the entire corporate network. Mr. Touboul decided to dare the impossible, to try to miniaturize all the security appliances found in the corporate server room into a credit-card size device that can be easily carried and connected to the laptop.

The attempt was successful. After two years of intensive research, the world's first miniature security appliance was created – Yoggie Gatekeeper™. Putting all the security solutions into such a small device requires robust processing power, and indeed the Yoggie Gatekeeper is as strong as a full-blown Pentium III PC (520 Mbps). But unlike a regular PC, it was designed as a security hardware, with a hardened operating system and physical separation between the unsafe zone (Internet) and the safe zone (connected to the laptop). The Yoggie Gatekeeper™, and the newer (USB key-sized) Yoggie Pico™, solve the vulnerabilities of traveling laptops by effectively extending robust corporate security to the traveling workforce. In addition to serving the corporate world, both the Gatekeeper and Pico are suitable for SMBs and home users.

Yoggie also has wide industry recognition: Winner of RSA Innovation Station 2007, Red Herring 100 Europe 2007, is Personal Computer World Recommended, Techworld short listed and winner of the IDSA and Business Week Silver IDEA award. The company continues to expand rapidly through its growing worldwide network of first class distributors and e-store.
