**Surf safely on holiday. Protection for your laptop, while you're away from home.**

Don't let internet attacks spoil your travel abroad with Yoggie's miniature internet security devices

**Yoggie Summer Special** – Any customer purchasing a Gatekeeper Pico during July-August will get a free carrying case.

LONDON, 9 July 2008 – People taking their laptop on holiday this summer are exposing the data on their computing device to security risks. Yoggie Security Systems offers a range of discreet, portable devices that block Internet threats and boost computer performance.

Internet hotspots, in hotels, cafes or airports, are notorious for being insecure. Connecting to the same network shared by multiple users reveals the identity of your computer, exposing it to numerous attacks including spam, phishing, malware, Trojans and worms. Yoggie's range of personal security computers provide powerful plug and play protection for laptop users.

The Yoggie Gatekeeper portable security devices provide 12 layers of security software including anti-spam, anti-virus and anti-phishing. All internet traffic is routed through the devices which provide a physical barrier between the laptop and the Internet to ensure that threats never reach the laptop itself. By removing the need to install software, the devices also improve laptop performance.

The Gatekeeper products are in fact a full-blown computer with their own processor, memory and unique operating system. They combine best-of-breed security software with proprietary technologies to provide the most comprehensive all-in-one internet security solution available to consumers today.

**Gatekeeper Pico™** is a USB stick device. MSRP: £75, available immediately. The Gatekeeper Pico, a sleek, silver USB-key, is in fact a full-blown computer with its own processor, memory and unique operating system. It combines best-of-breed security software with proprietary developments to provide the most comprehensive all-in-one security technology available to consumers today.

**Gatekeeper Card Pro™** provides the same functionality as the Pico but in ExpressCard format, so is truly 'plug and forget' technology. MSRP: £99, available now and holiday makers are urged to pre-order to get the Gatekeeper Card Pro in time for their holidays.

In addition to the Gatekeeper range, Yoggie offers the **Firestick Pico™**, for users seeking hardware firewall-only protection. The Firestick Pico™ is a portable USB mini-computer that

replaces your software Firewall and protects your computer from malicious attacks before they can reach your PC. Unlike software firewalls, the Firestick Pico is based on a dedicated hardware platform specifically designed to protect PCs from the most devastating menaces including denial of service, buffer overflow and the broadest range of malicious attacks. MSRP: £60

All products are available now from **www.yoggie.com** or via UK e-tailers Amazon, Play.com, Expansys, Maplin and PC World.

### **About Yoggie Security Systems**

Yoggie Security Systems established in 2005 by Shlomo Touboul – the inventor of Behaviour Based Blocking Technology – is the developer of the world’s first hardware-based computer security solution. Yoggie’s range of USB key-sized and ExpressCard-sized security minicomputers connects to any PC or laptop at home, in the office and on the road – blocking Internet threats outside the host computer and boosting computer performance by off-loading installed security software. Yoggie’s products combine best of breed security software with propriety patent pending developments to provide the most comprehensive all-in-one security technology available to both consumers and corporate users.

Yoggie has been recognized by numerous prestigious industry organizations for its unique and innovative security technology. The company continues to expand rapidly through its growing worldwide network of first class distributors, resellers and its own e-store and offers a comprehensive support service including 24/7 telephone support and an online knowledge base.

Yoggie, Yoggie Security Systems, Yoggie Pico, Firestick Pico, Gatekeeper Pico, Gatekeeper Pico Pro and Gatekeeper Card Pro are trademarks of Yoggie Security Systems. All other trade names are the property of their respective owners.
