

Yoggie Security Systems named as finalist for CNET Networks UK Business Technology Awards 2008

Gatekeeper Pico Pro™ named as finalist in security product of the year category

Beth Halevy, 15 July 2008 – Yoggie Security Systems™ today announced that it has been named as a finalist of the 2008 CNET Business Technology Awards for its innovative Gatekeeper Pico Pro™ technology.

Winning a CNET Networks UK Business Technology Award has become one of the most sought-after accolades for all those involved in business technology in the UK. The Awards continue to attract entries from the entire spectrum of user organisations and technology companies whether they are a small start-up, vertical specialist or technology giant.

Tony Hallett, Editorial Director, Technology and Business, for CNET Networks UK, and Chair of the Judging Council, said; “Despite the current economic climate, it is clear that business technology in the UK continues to go from strength to strength. The sheer quantity and quality of entries received highlights the outstanding talent in the industry and we’re proud to recognise some of the most exciting developments of the last year.”

Developed by a team led by Shlomo Touboul, the Gatekeeper Pico Pro is USB key-size security mini-computer, Linux-based 520 MHz with 13 built-in security applications off-loads security software, extends corporate-level security to travelling laptops, and speeds computer performance.

Designed to operate independently of the user, it boots up automatically with the laptop or PC and begins protecting the host computer immediately. A specially created low-level driver hijacks all network connections, routing Internet traffic through the device before it reaches the host computer, ensuring any attacks hit it and not the host computer. Full list of security functions:

- Integrated stateful inspection firewall

- Snort Intrusion Detection System
- Snort Intrusion Prevention System
- Sourcefire VRT certified Snort rules
- Kaspersky anti-virus
- Kaspersky anti-spyware
- MailShell anti-spam
- MailShell anti-phishing
- Web (HTTP/FTP) proxy
- Mail (SMTP/POP3) proxy
- SurfControl Web content filtering
- Adaptive Security Policy
- Multi-Layer Security Agent
- VPN client
- Layer-8 Security Engine

Unlike Router anti-virus, it uses a powerful true-type detection engine, the proxies can deal with any content type, including decompiled elements such as compressed class and file attachments. These elements are analyzed by seven security agents. “Yet again we are being recognized as having a highly innovative product which can meet the needs of travelling workers and consumers. We are delighted to be finalists and the Yoggie team is proud of the progress we are making to ensure that security is becoming easier to manage and implement across the board,” commented Shlomo Touboul, Founder and CEO, Yoggie Security Systems.”

About Yoggie Security Systems™

Yoggie Security Systems established in 2005 by Shlomo Touboul – the inventor of Behaviour Based Blocking Technology – is the developer of the world’s first hardware-based computer security solution. Yoggie’s range of USB key-sized and ExpressCard-sized security minicomputers connects to any PC or laptop at home, in the office and on the road – blocking Internet threats outside the host computer and boosting computer performance by off-loading installed security

software. Yoggie's products combine best of breed security software with propriety patent pending developments to provide the most comprehensive all-in-one security technology available to both consumers and corporate users.

Yoggie has been recognized by numerous prestigious industry organizations for its unique and innovative security technology. The company continues to expand rapidly through its growing worldwide network of first class distributors, resellers and its own e-store and offers a comprehensive support service including 24/7 telephone support and an online knowledge base.

Yoggie, Yoggie Security Systems, Yoggie Pico, Firestick Pico, Gatekeeper Pico, Gatekeeper Pico Pro and Gatekeeper Card Pro are trademarks of Yoggie Security Systems. All other trade names are the property of their respective owners.
